

The Simply WOS Advantage

SimplyWOS Workflow Management System is a key part of the managing the movement Work Orders through the Shop Floor from Sales Order Entry , auto creation of the Work Order Docket and scheduling and tracking the workflow thru finite machines resources.

Simply WOS provides rigid electronic document control by embedding the business checks and balances be it sign off approvals on dockets , material availability for work order and optimizes the scheduling/planning task for these work orders .

Having a Simply WOS in place means you don't depend any more on people's experience, the system has the intelligence.

From automatic Work Order generation , managing the work order review cycle thru key personnel and finally scheduling the Shop Floor resources when the system acknowledges the approval , Simply WOS synchronizes and alerts all stakeholders ensuring total visibility of the workflow process.
